

Der Marchfeldkanal in Wien und Niederösterreich: die Bedeutung eines naturnah gestalteten Kanalsystems für Brutvögel

Karin Pfeiffer & Christian H. Schulze

Egretta 56: 16-35

Tab. A1: Liste aller nachgewiesenen Brutvögel, sowie die Anzahl an Brutpaaren (BP), angegeben für alle untersuchten 200 m langen Abschnitte des Marchfeldkanals.
 Tab. A1: List of all recorded breeding bird species, and their number of breeding pairs in all surveyed 200 m transects along the Marchfeld channel.
